

## **Here's What Democrats Believe**

Democrats believe that the economy should work for everyone, health care is a right, our diversity is our strength and democracy is worth defending. Democrats are socially and economically liberal and generally favor enforced rights for racial and ethnic minorities, women, LGBTQ+ people, abortion access, and collective bargaining by workers. Democrats favor government intervention to expand voting access, fight environmental degradation and climate change, and enforce stricter gun laws. Democrats also support progressive taxation, where wealthier people pay a higher share of their income to the federal government.
